

Technology that holds up under inspection.

Purpose built IT and cybersecurity support for life science organizations.

Life science organizations run validated systems, instrument networks, and research data under regulatory scrutiny, usually with a small internal IT team. BCS365 provides the operating and security layer without disrupting the validated environment.

WHAT THESE ORGANIZATIONS ARE UP AGAINST

- Validated systems cannot be patched or changed on a normal IT cadence.
- Instrument and lab networks sit outside standard endpoint management.
- Sponsors, partners, and auditors demand documented controls and evidence.

WHAT BCS365 DELIVERS

- 24/7/365 service desk and endpoint management
- Lab and instrument network support
- Change control aligned to validated systems
- Research data protection and backup validation
- Identity governance and access reviews
- Environmental monitoring for labs and cold storage
- Secure collaboration with CROs and partners
- Audit evidence and documentation packages

STANDARDS AND FRAMEWORKS WE WORK TO

- FDA 21 CFR Part 11
- GxP: GLP, GCP, GMP
- HIPAA and HITECH
- NIST CSF
- ISO 27001
- SOC 2 Type II

WHY IT MATTERS TO YOU

High value accounts

Regulated, funded, and growing, with real budget for doing it properly.

Sticky by nature

Validated environments are not switched casually once they are running.

Broad scope

Labs need cabling, sensors, security, and cloud, not just a service desk.

SIGNALS TO LISTEN FOR

- "We are preparing for an inspection and our documentation is thin."
- "Our lab instruments are on the same flat network as everything else."
- "A sponsor sent us a security questionnaire we cannot complete."

HOW TO BRING US IN

- Send the name and one sentence of context to your BCS365 contact
- Take 15 minutes on an opportunity huddle to confirm fit
- We join your customer call and run discovery. You lead it
- Register through AVANT as usual. Nothing commercial changes

Environmental monitoring for labs and cold storage is often the easiest first deal in this vertical, and it puts BCS365 onsite before the wider conversation.

Capability summary only. Exact services, coverage, responsibilities, and commercial terms are opportunity specific and governed by the executed MSA and CFS.
BCS CallProcessing, LLC dba BCS365.
