

Secure the network **you just sold them.**

Enterprise network security designed to fortify infrastructure and prevent threats.

A new circuit, firewall, or SD WAN deployment creates an immediate operational question: who configures it, watches it, and keeps it current. BCS365 attaches the security operations layer around the connectivity the Trusted Advisor already sold.

THE CUSTOMER PROBLEM

- The firewall is installed, licensed, and then never touched again.
- Perimeter and internal traffic go unmonitored, so lateral movement is invisible.
- Configuration drift accumulates across sites with no standard and no review.

WHAT BCS365 DELIVERS

- NSM: network security monitoring, perimeter and internal
- Firewall management, policy review, and firmware
- Segmentation design and enforcement
- Secure remote access and VPN management
- Wireless security and rogue detection
- Multi site standards and configuration control
- Integration with the 24/7 SOC
- Change management and documented configurations

WHY IT MATTERS TO YOU

Natural attach

Connectivity deals create the need.
This is the layer that answers it.

Protects your sale

A poorly run network makes the circuit
you sold look like the problem.

Multi site scale

Standards work compounds as the
customer opens or acquires locations.

SIGNALS TO LISTEN FOR

- "We just refreshed the firewall but nobody manages it."
- "We are rolling out SD WAN across twelve sites."
- "Our network is flat and we know that is a problem."

HOW TO BRING US IN

- Send the name and one sentence of context to your BCS365 contact
- Take 15 minutes on an opportunity huddle to confirm fit
- We join your customer call and run discovery. You lead it
- Register through AVANT as usual. Nothing commercial changes

DELIVERY MODELS AND CREDENTIALS

- Fully managed
- Co-managed
- Staff augmentation
- Project services
- 24/7/365 U.S. based NOC and SOC
- ISO/IEC 27001:2022 certified

This is the most natural attach in the entire AVANT portfolio. Every connectivity opportunity has a network security conversation sitting directly behind it.

Capability summary only. Exact services, coverage, responsibilities, and commercial terms are opportunity specific and governed by the executed MSA and CFS.
