

## BCS365: the ISO 27001 certified MSSP!

Benefit from better information security and full compliance support.

### We Help You...

- ✓ Eliminate uncertainty about how data is being stored and managed.
- ✓ Ensure data integrity and restrict changes without approval or consent.
- ✓ Guarantee confidentiality by protecting data from unauthorized access and disclosure.
- ✓ Maximize your security posture and improve data security across your organization.
- ✓ Increase data availability to boost organizational performance and secure business continuity.
- ✓ Recover quickly in the event of a security breach to your network and systems.
- ✓ Ensure full compliance with industry regulations.

### An ISO 27001 certified MSSP has...

- ✓ Proven experience in information security practices and the management of cyber threats
- ✓ Been independently assessed on our data protection capabilities
- ✓ Processes in place to protect data and respond to security incidents

### We Can...

- ✓ Deliver the full scope of services, including:
  - security consulting and advisory
  - risk assessments
  - security controls design & implementation
  - security operations center (SOC)
  - incident response plans (IRP)
  - cyber threat training
- ✓ design a holistic information security program that effectively protects your business operations

Internationally-recognized information security standards which help businesses develop, implement, maintain, and continually improve their security program.
